

Brand Identity

En Tong

Introduction

- Give an overview/ general description of your portfolio design rationale:

My portfolio theme is 'Playful Tech with Soft Professionalism'. I chose this to reflect both my creative design side and my technical coding background. The design uses soft colors and rounded shapes to give a welcoming and clean feel, balanced with clear layouts and consistent typography. This helps convey that I'm capable of building user-friendly, modern experiences. The tone is friendly yet professional, ideal for internship recruiters looking for a designer-coder hybrid.

Human-Centred Design

Target Audience of your portfolio (Profile)

Age: 20-35 years old

Gender: All genders

Income bracket: Middle to upper-middle income, typically hiring managers or internship recruiters

Educational background: Diploma or Degree holders in tech, design, or HR fields

Computer literacy: High, familiar with browsing portfolios, using design tools, and assessing technical skill

Human-Centred Design

Target Audience of your portfolio (Profile)

Motivation to use the app: To evaluate a student designer/coder's creative and technical abilities, design style, and suitability for internships or entry-level roles. They are looking for someone who can think visually, communicate ideas, and work across design and code.

User Behaviour Preferences: They prefer clear and concise information, visual storytelling, and a professional but engaging experience. They value clean layouts, original design elements, and portfolios that are easy to navigate and visually memorable.

Human-Centred Design

Target Audience of your portfolio (Portfolio theme)

Portfolio Theme: “Playful Tech with Soft Professionalism” This theme combines a soft, approachable design style with clean structure and clarity. It reflects a balance of creativity and capability, important for internship recruiters who are looking for talent that is skilled, but also imaginative and fun to work with. Rounded UI, pastel colors, friendly icons, and modern layouts create a welcoming experience while still feeling polished and professional.

Branding & Visual Consistency

Colour scheme, colour palette and typography guide

- Colour scheme: Monochromatic

- Colour palette:

- Typography used:

Hello (dreaming out loud pro)

Hello (comic sans MS)

Creating Original Assets

- Design **at least 5 custom assets** (e.g., icons for achievement, skillsets competency bar, contact, tab, etc).
- Ensure all assets are **original** and well-structured for a portfolio.

Example:

Create a **icon** that visually represents students' competency.

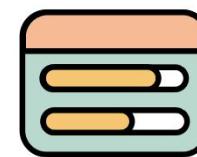

Skillset

Community Work

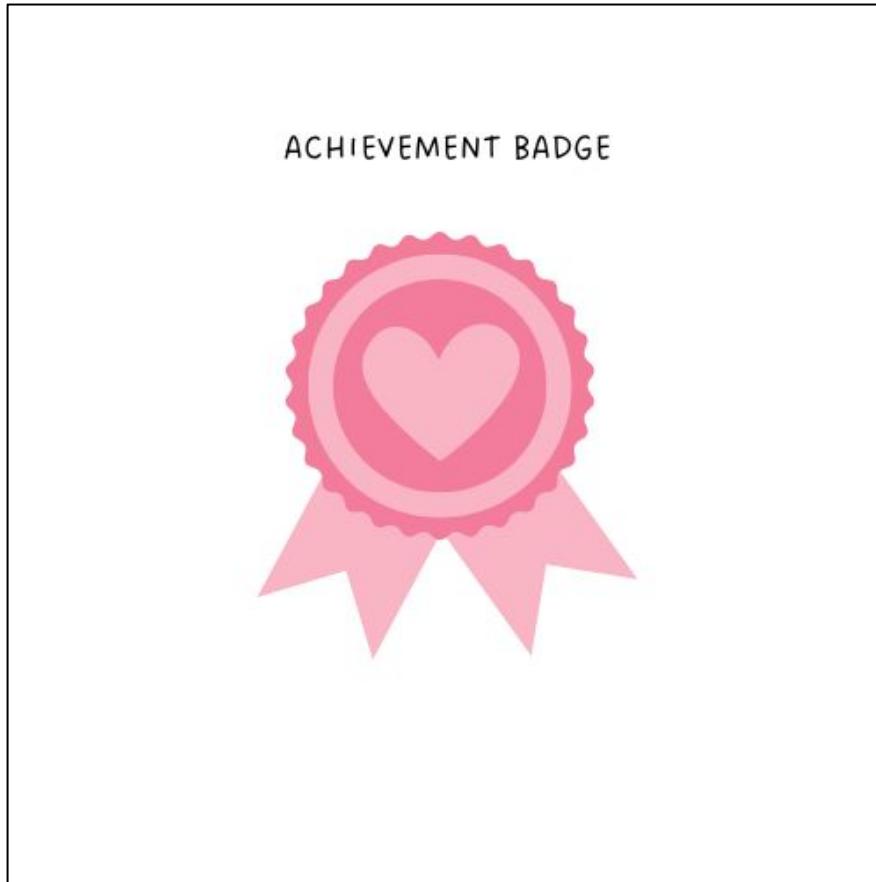

Achievements

Progression

Original Assets 1 : icon for achievements

AI-Assisted Design Tools

- Use **Photoshop's AI features** (e.g., Generative Fill, AI-powered selection) or **Illustrator's AI tools** (e.g., Vector recolouring, Auto-trace).
- Submit **before-and-after screenshots** showing how AI tools improved your design.

Example:

- Use **Adobe Firefly** to generate a **background texture** that enhances your interface's modern look.

Prompt Design & AI Collaboration

- Write **three AI prompts** for generating icons, textures, or design variations. Show **AI-generated variations** and **justify your final selection**.
- AI prompt 1: A rounded pastel pink achievement badge with a heart in the center and sparkles around it, soft shadows and minimal 3D look
- AI prompt 2: A pastel pink background texture with tech circuit patterns and sparkles, subtle gradients, and a soft glowing effect
- AI prompt 3: A contact icon set, email & LinkedIn all with soft pastel pink backgrounds, rounded edges

Chosen 3 from each 3 AI prompts:

AI Prompt 1 justification:

AI prompt: A rounded pastel pink achievement badge with a heart in the center and sparkles around it, soft shadows and minimal 3D look

Justification: because the soft glow and 3D look matched my “soft professionalism” theme, it’s on brand.

**Chosen
Variation**

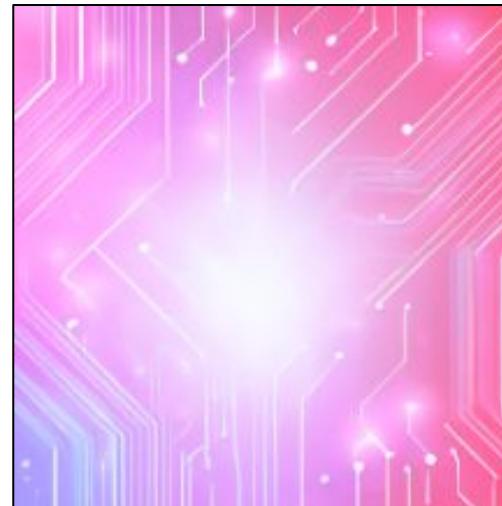

AI Prompt 2 justification:

AI prompt: A pastel pink background texture with tech circuit patterns and sparkles, subtle gradients, and a soft glowing effect

Justification: it keeps the “tech” identity subtle but clear. The pastel glow and grid structure help the layout feel modern yet not overwhelming.

Chosen

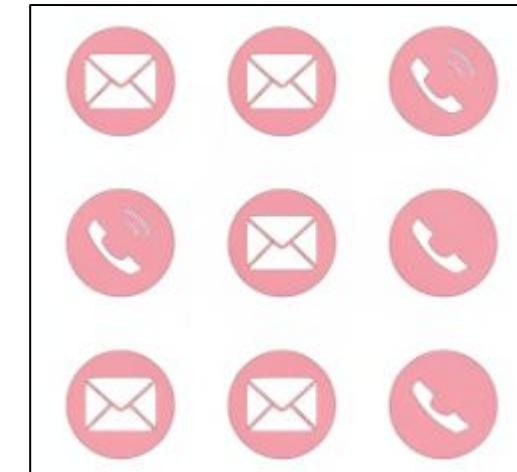

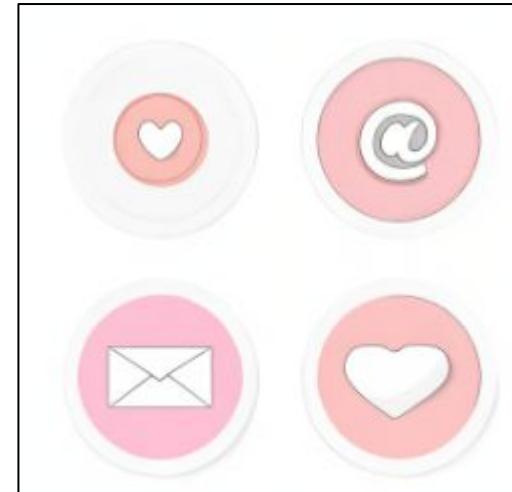

AI Prompt 3 justification:

AI prompt: A contact icon set, email & LinkedIn all with soft pastel pink backgrounds, rounded edges

Justification: the format of the email contact icon seems clean. It also helps maintains brand consistency with the rest of the UI.

Chosen Variation

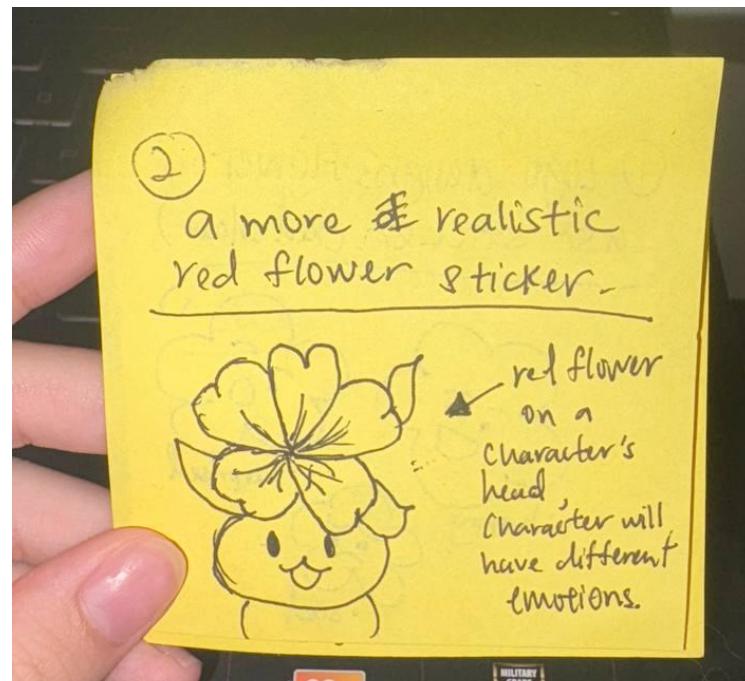

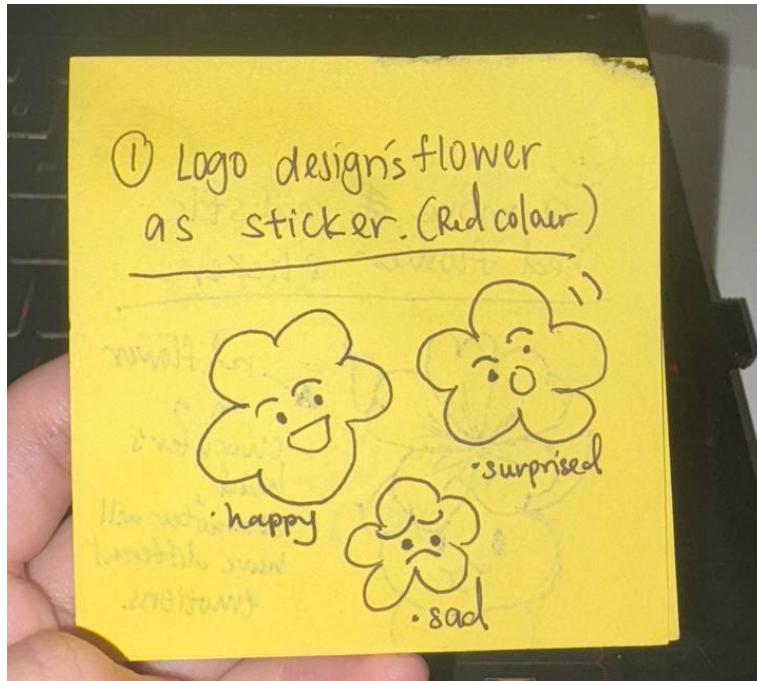

Final Artwork (**Chat Sticker**)

The character is a cute chibi styled girl wearing the red flower as a hat, which connects directly to my logo and personal identity. Using the red flower as a hat keeps the brand consistent and meaningful, as the red flower represents my Chinese name. The chibi style adds a playful and friendly vibe, fitting my theme of “Playful Tech with Soft Professionalism.”

The chibi character in my stickers is a mini version of me, it represents myself in a cute, fun way. The red flower hat is based on my Chinese name, which gives the design personal meaning. Together, the character and flower show my personality and cultural background. This adds a personal touch to my brand and helps people remember me through my work.

Choose **ONE** digital component to design for social media promotion:

- **Telegram/WhatsApp chat stickers:** A set of three chat stickers

Final Artwork (Portfolio Web page: Home Page)

Final Artwork (Portfolio Web page: About)

Final Artwork (Portfolio Web page: Portfolio)

The screenshot shows a portfolio website with a pink header and a light pink background. At the top left is a circular logo with a red flower and the word "entong". To its right are three rounded rectangular buttons: "HOME PAGE", "ABOUT", and "CONTACT". Below these is another button labeled "PORTFOLIO". In the center, there's a text box containing the following message:

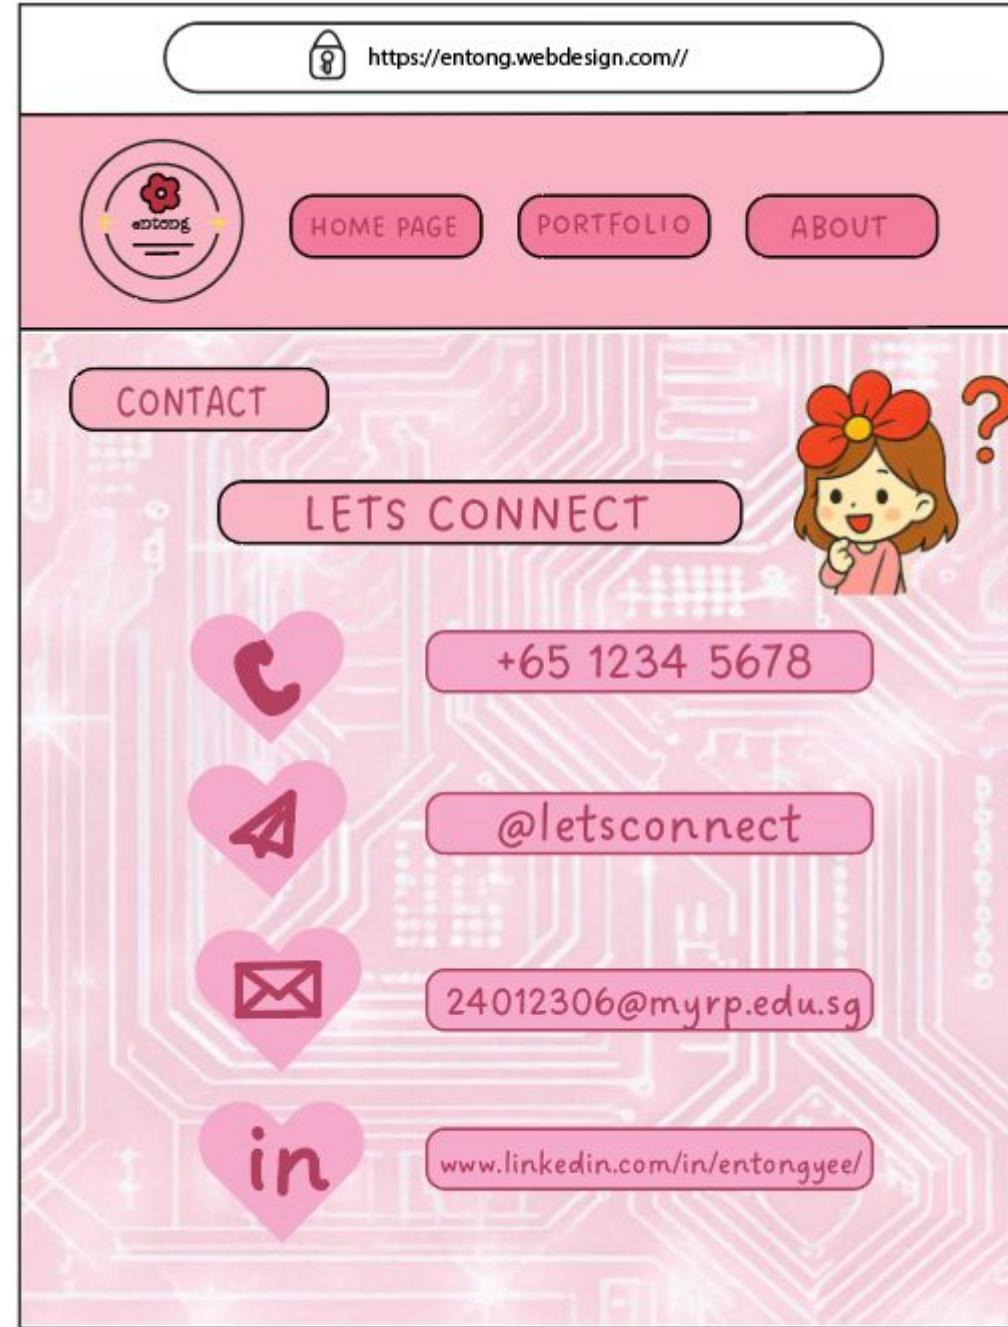

Here are some of my favourite projects where I got to code, design, and explore creative ideas, from data dashboards to VR game.

On the right side of the page is a cartoon illustration of a girl with brown hair and a large red flower in her hair, wearing an orange shirt and thinking with a hand on her chin. Below the text box is a button labeled "PROJECTS I'M PROUD OF". Underneath this button is a call-to-action text: "Click on [MORE DETAILS >](#) to find out more".
The main content area displays six project cards arranged in two rows of three:

- Welcome to Elderly Assistance**: An elderly assistance web. [MORE DETAILS >](#)
- UNITY VR ESCAPE ROOM**: Unity VR escape room. [MORE DETAILS >](#)
- Products from Supermarket App Database**: A database integration list web. [MORE DETAILS >](#)
- CHARACTER DESIGNS**: Character designs. [MORE DETAILS >](#)
- BRAND DESIGNS**: Brand designs. [MORE DETAILS >](#)
- COLOUR THEORY AND MOOD BOARDS**: Colour theory and mood boards. [MORE DETAILS >](#)

On the right side of the project area are two vertical arrows pointing up and down, likely for navigating through more projects.

Conclusion (Reflections, Challenges)

- Throughout this project, I explored how to express my personal identity through design, from creating a logo to building custom assets and web pages that reflect my playful yet professional brand. A big part of my branding was incorporating the red flower, which connects to my Chinese name, and using a chibi character to represent myself in a fun and approachable way.
- Using tools like Canva, Adobe Illustrator, and Photoshop, I learned to balance creativity with structure. I challenged myself to stay consistent with my theme of soft pinks, rounded visuals, and friendly UI.
- One challenge I faced was making sure my custom assets were original and meaningful. I also had to understand how to use AI tools responsibly to enhance, not replace, my work. Through the process, I learnt how every design choice from stickers to icons to taglines can help make a portfolio more memorable, unique and show my personality.
